July 22 – 31, 2019

ICC: Much More than Technology

Handling ICT and AT has become a prerequisite for blind and partially sighted people for inclusion in education, vocational training, leisure, culture and politics. Technology has not just increased accessibly for those with sight impairment but has been a key factor in building awareness for constant change within the sector.

ICC's focus is on making use of ICT in the best way for

- interaction and communication
- integration in education (school/university)
- enhanced opportunities in the labour market
- independent living and leisure time activities

ICC is an incentive to acquire the skills needed for your own future!

ICC is international and provides a unique occasion to enjoy yourself and to get the feeling of being part of a greater international community of colleagues with similar interests.

Workshops

Based on your needs and previous knowledge you are invited to select from a list of more than 20 workshops (3 and 6 hours each), focusing on

- latest ICT / AT (e.g. Internet, music, speech input, games, coding)
- social and presentation as well as daily living skills
- ICT and AT supported mobility
- managing to start to study at university
- job search and labour market integration skills
- …

National coordinators support you in putting together your individual workshop programme for the camp.
